LOW COST FARM STORAGE MONITORING

TEAM NAME:ECO-COOL

SUBMITTED BY:

SRIDHAR B

YOGESWARI G

SHARATH M R

MAHENDIRAN M

Problem Statement

Farmers lose crops due to poor storage conditions

Temperature and humidity changes spoil produce

Small farmers cannot afford expensive storage
systems

Need a simple and low-cost monitoring solution

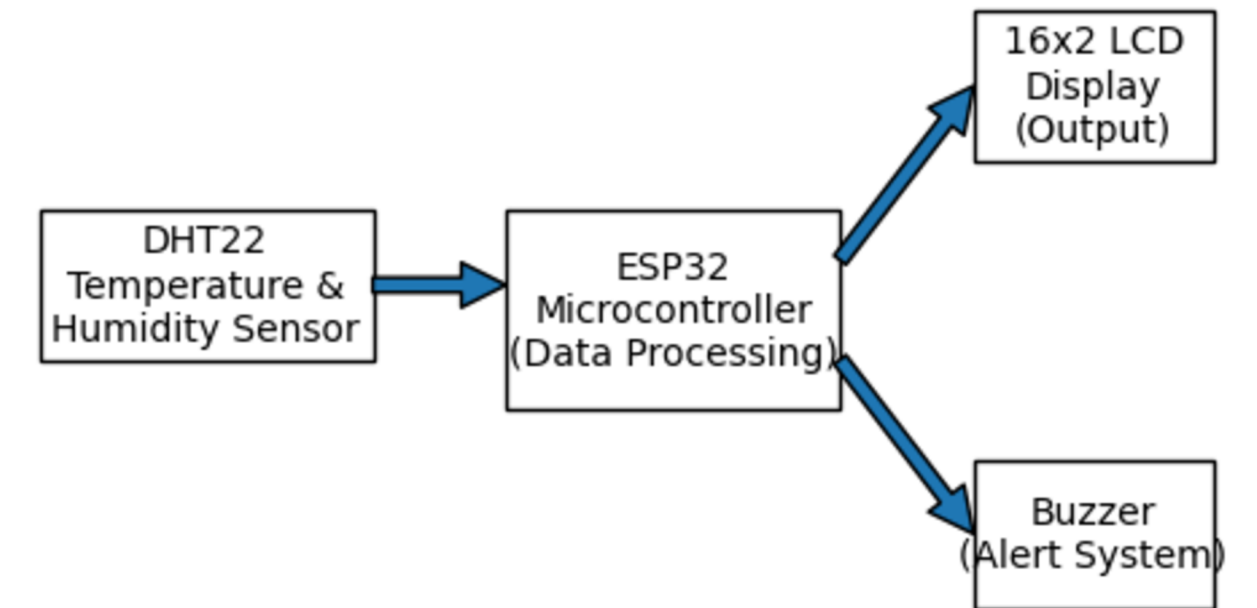

Project Objective

Monitor temperature
and humidity in
storage

Alert farmers when
conditions are
unsafe

Store data for
future analysis

Keep the system
low-cost and easy
to use

Components Used

ESP32
Microcontroller

DHT22
Temperature &
Humidity Sensor

LED Display

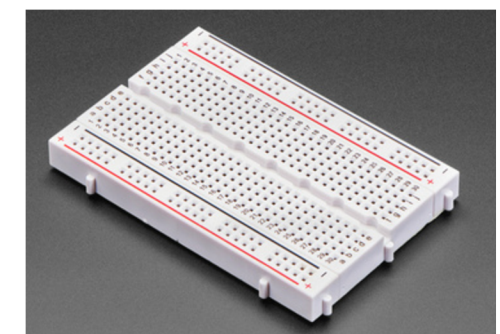

Buzzer

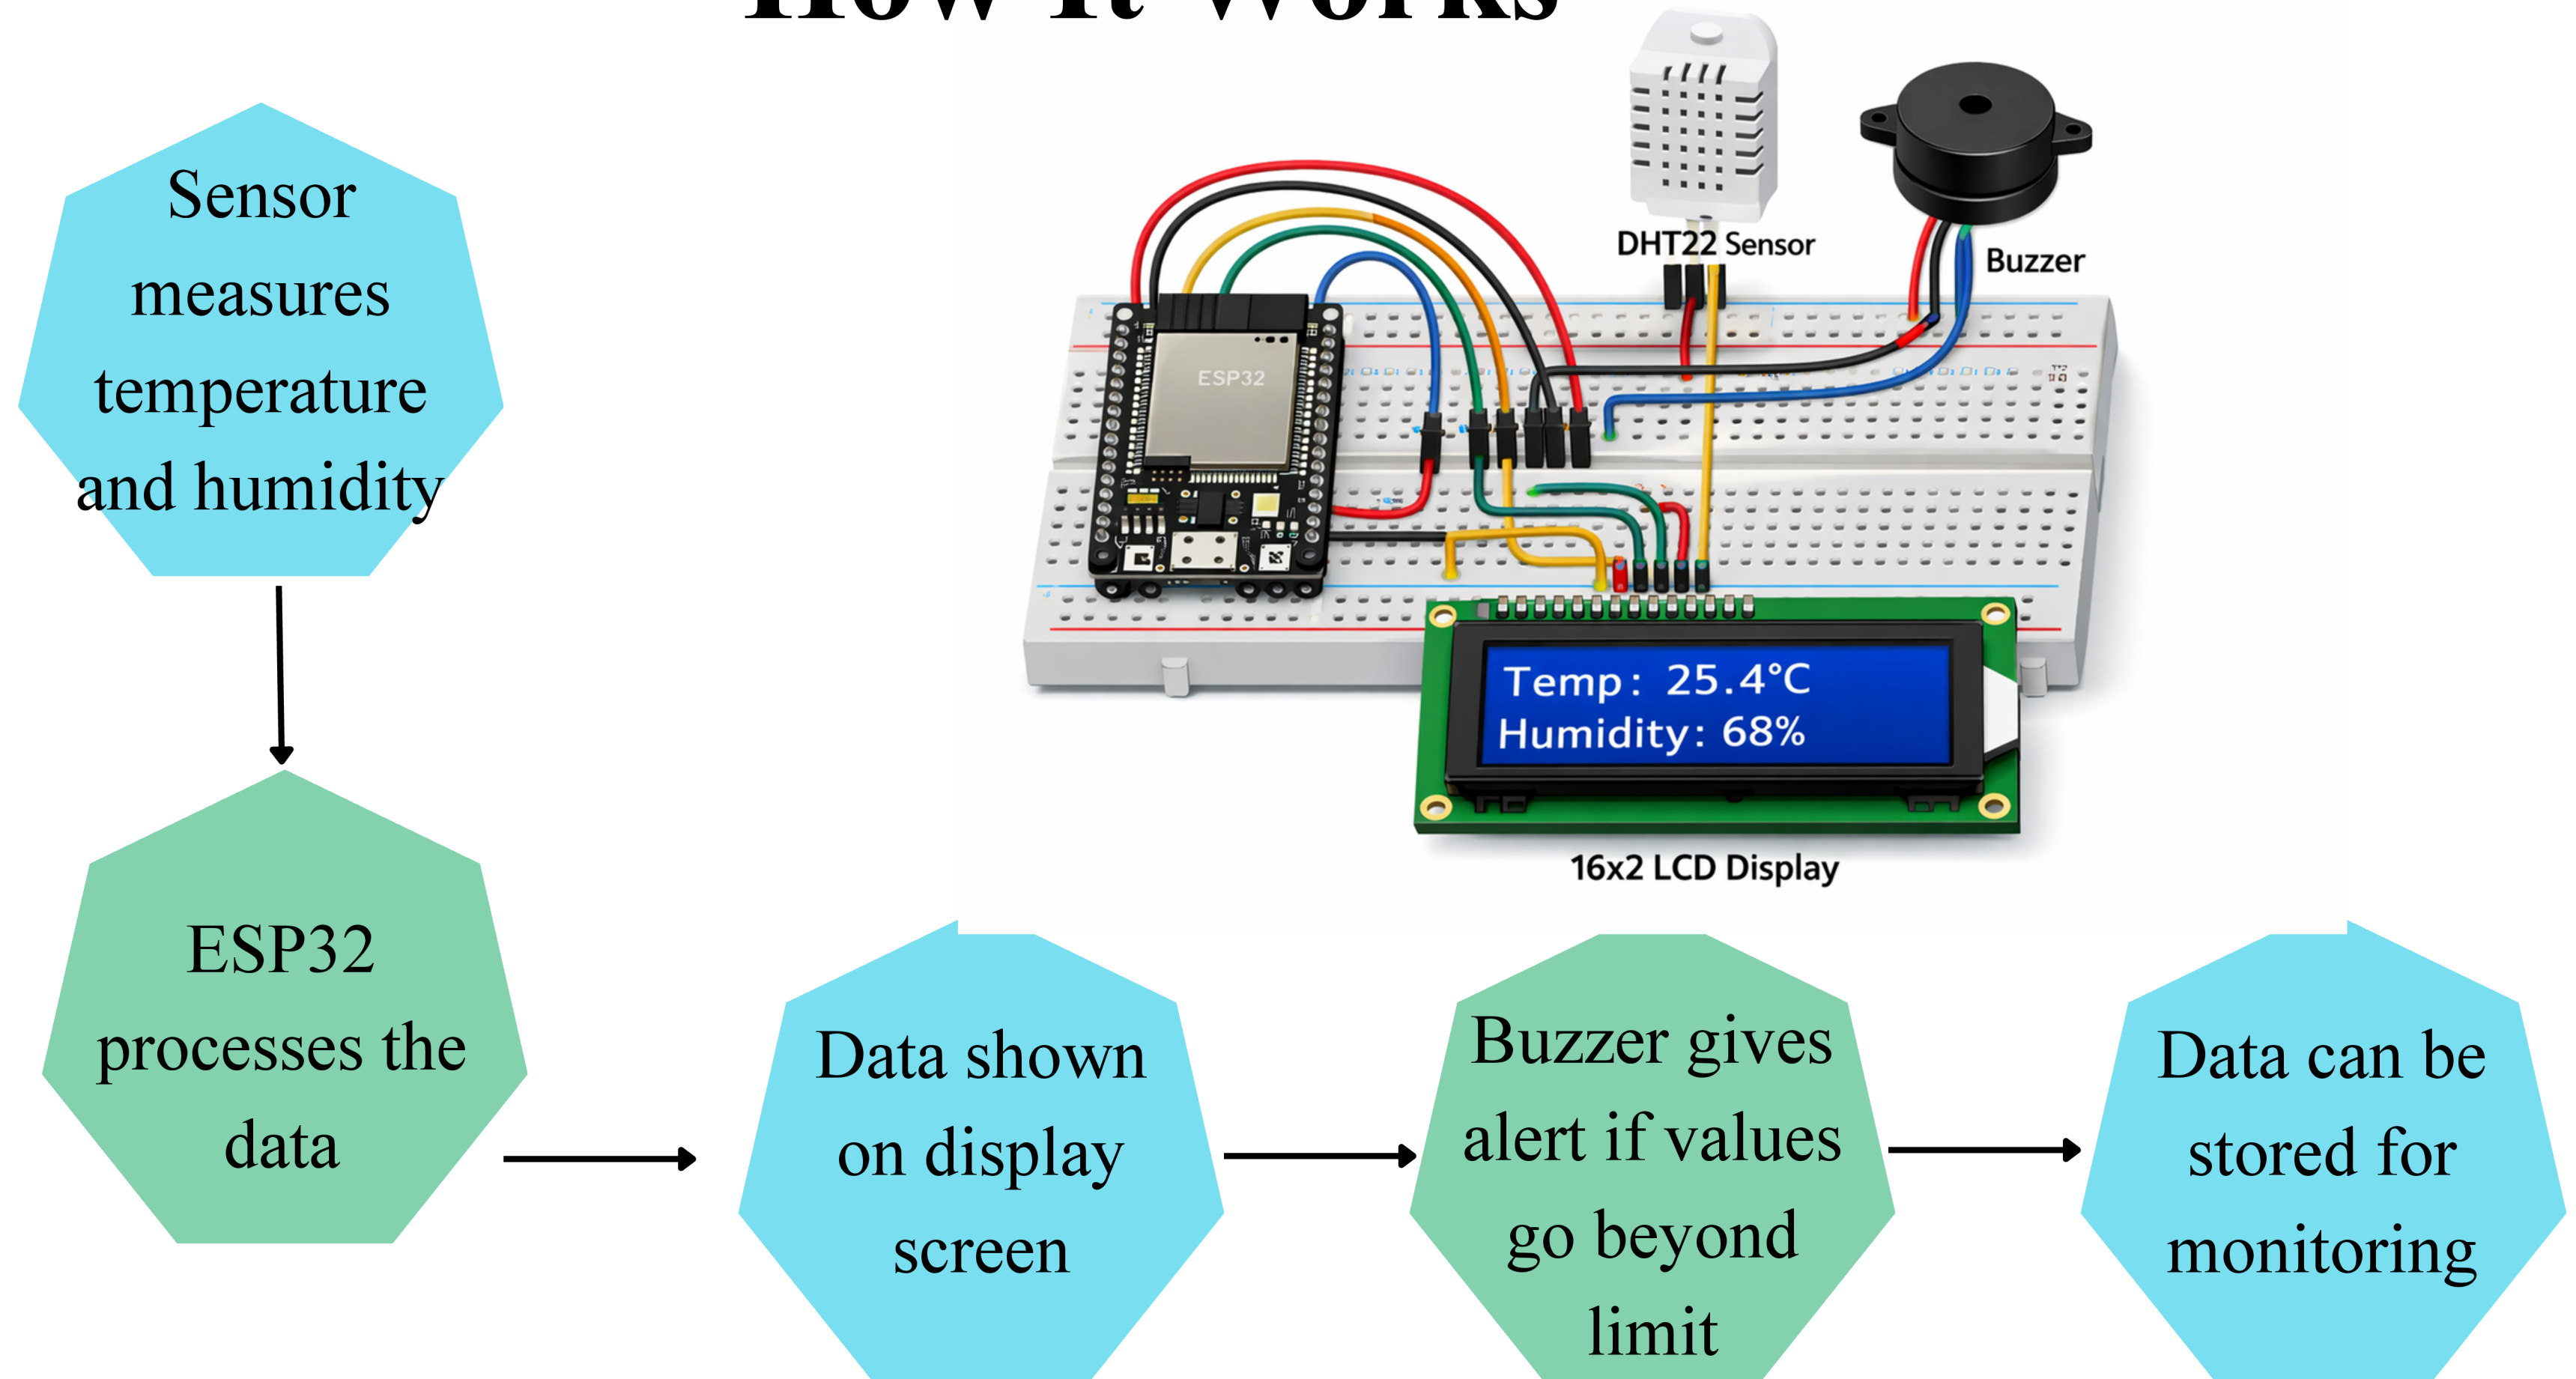

Power Supply

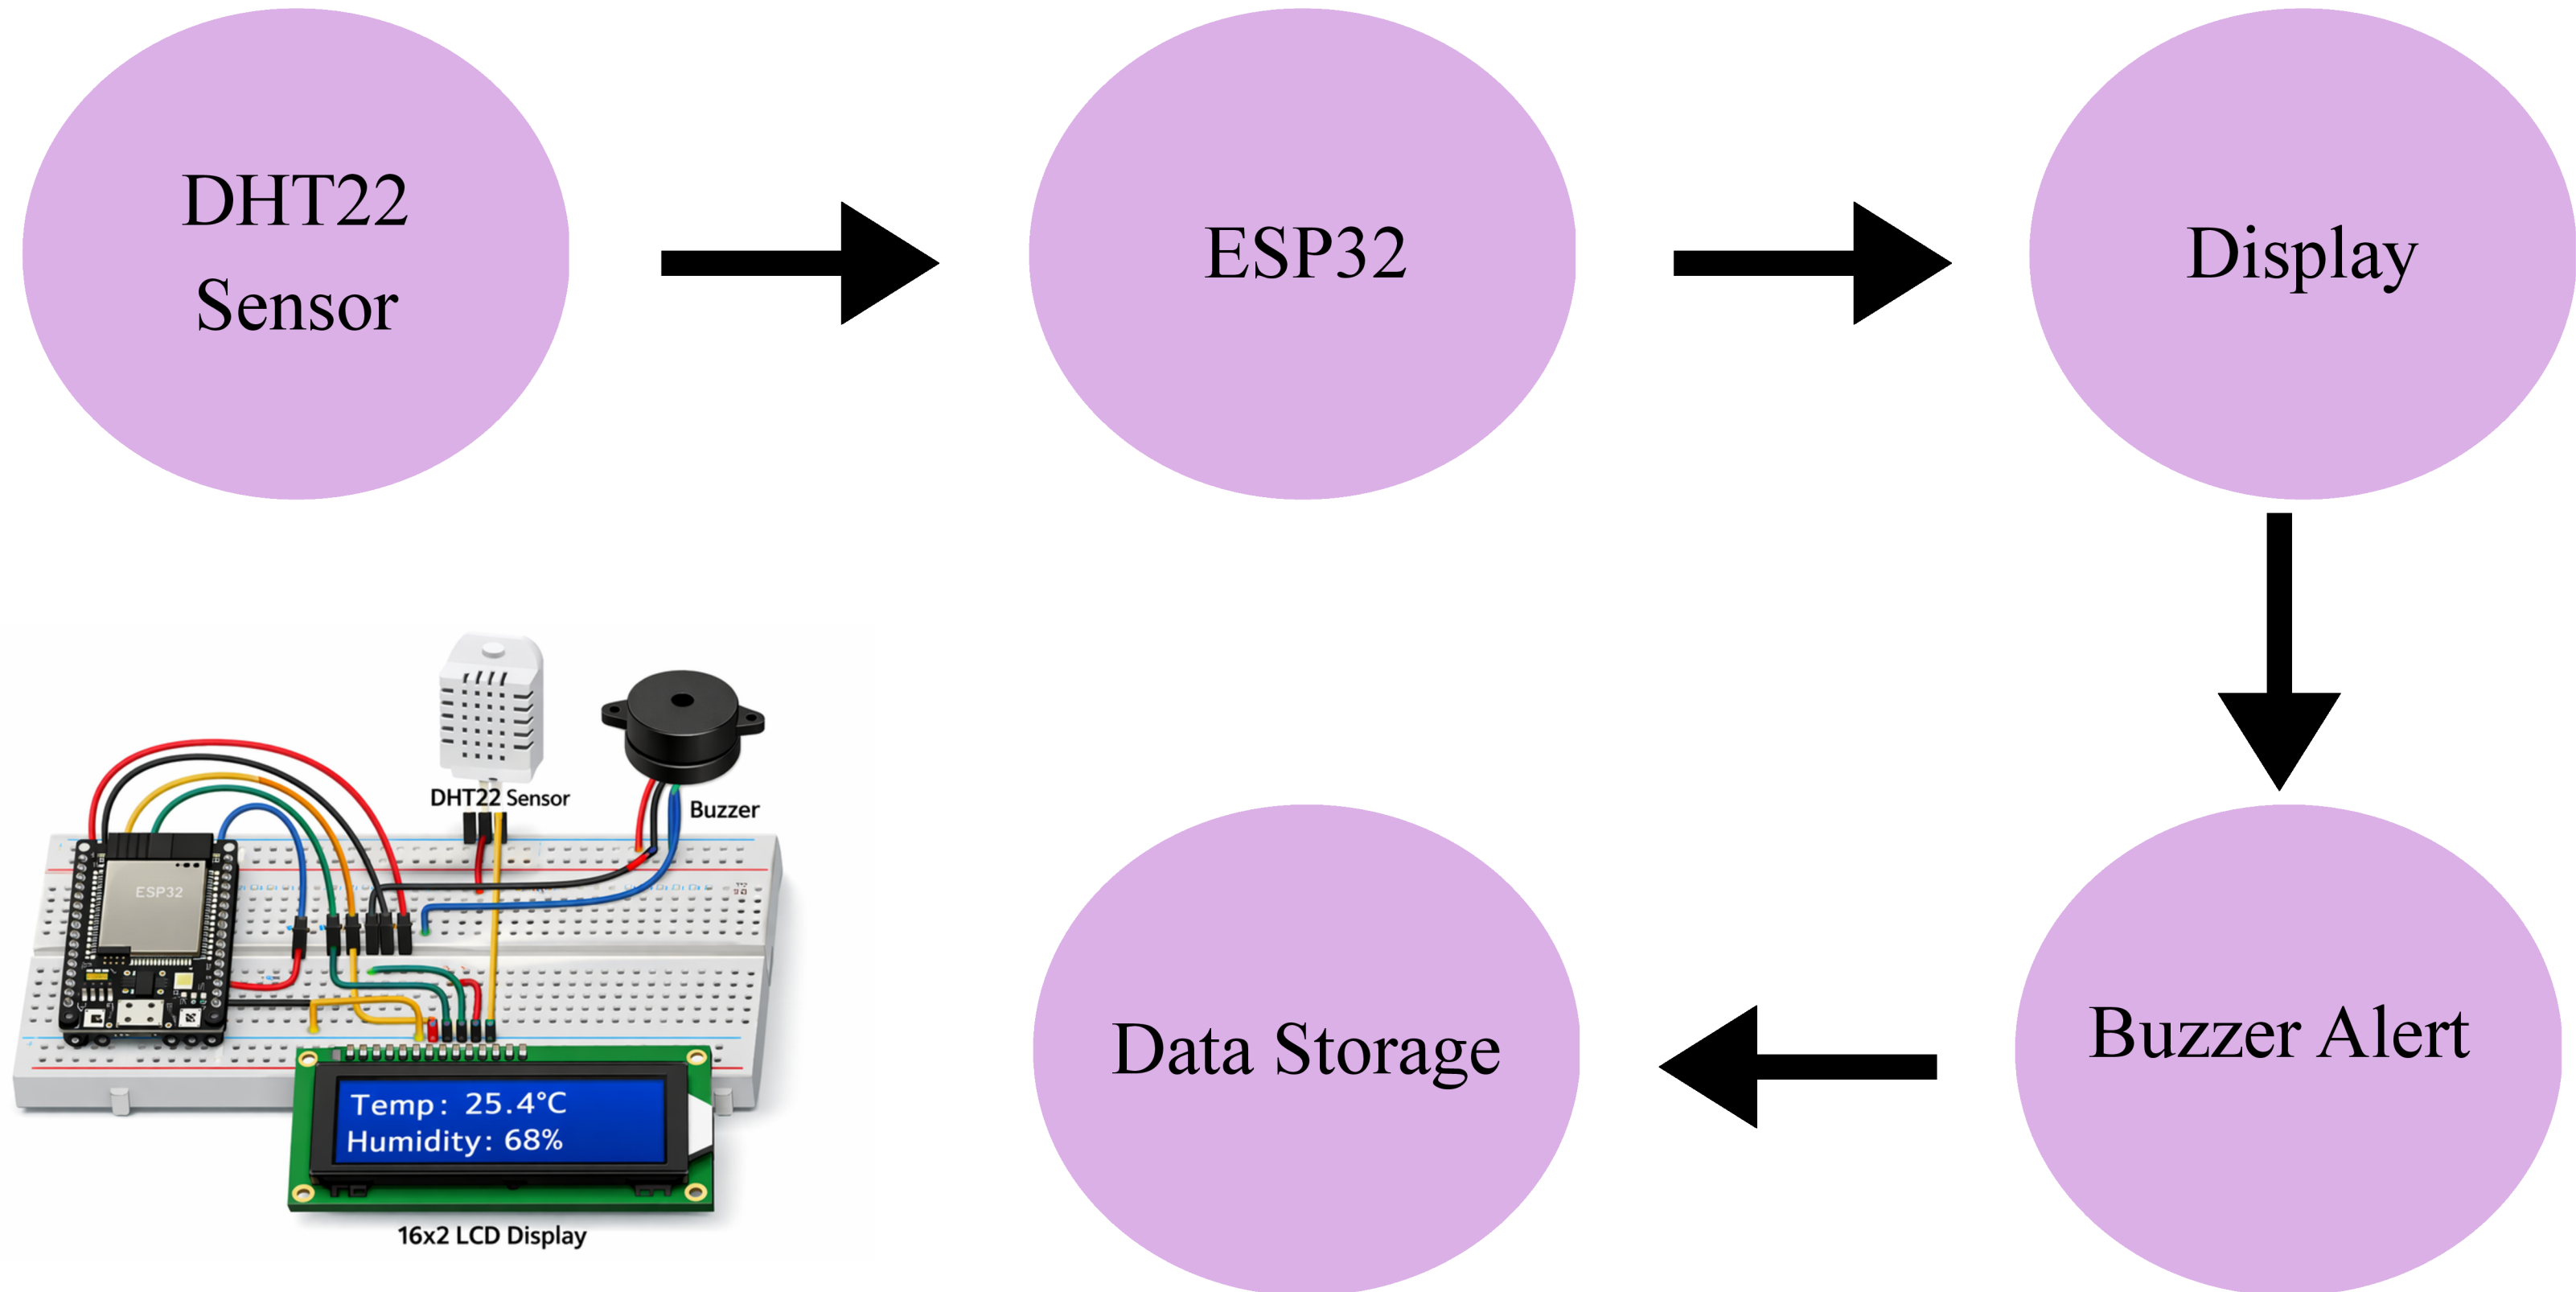

Breadboard

How It Works

System Overview

Advantages

Low cost and affordable

Easy to install and maintain

Reduces crop spoilage

Helps farmers take quick action

Can be upgraded to IoT system

Conclusion

AgriGuard is a simple and smart
solution

To protect farm produce during
storage

It helps farmers save money and
reduce losses

using low-cost technology

THANK YOU
